A First Course in Fuzzy and Neural Control By Hung T. Nguyen, Nadipuram R. Prasad, Carol L. Walker, Ebert A. Walker

Although the use of fuzzy control methods has grown nearly to the level of classical control, the true understanding of fuzzy control lags seriously behind. Moreover, most engineers are well versed in either traditional control or in fuzzy control—rarely both. Each has applications for which it is better suited, but without a good understanding of both, engineers cannot make a sound determination of which technique to use for a given situation.

A First Course in Fuzzy and Neural Control is designed to build the foundation needed to make those decisions. It begins with an introduction to standard control theory, then makes a smooth transition to complex problems that require innovative fuzzy, neural, and fuzzy-neural techniques. For each method, the authors clearly answer the questions: What is this new control method? Why is it needed? How is it implemented? Real-world examples, exercises, and ideas for student projects reinforce the concepts presented.

Developed from lecture notes for a highly successful course titled *The Fundamentals of Soft Computing*, the text is written in the same reader-friendly style as the authors' popular *A First Course in Fuzzy Logic* text. *A First Course in Fuzzy and Neural Control* requires only a basic background in mathematics and engineering and does not overwhelm students with unnecessary material but serves to motivate them toward more advanced studies.

A First Course in Fuzzy and Neural Control By Hung T. Nguyen, Nadipuram R. Prasad, Carol L. Walker, Ebert A. Walker **Bibliography**

- Sales Rank: #3556680 in Books
- Brand: Chapman and Hall/CRC
- Published on: 2002-11-26
- Ingredients: Example Ingredients
- Original language: English
- Number of items: 1
- Dimensions: .88" h x 6.16" w x 9.90" l, 1.33 pounds
- Binding: Hardcover
- 320 pages

Editorial Review

Review

...Simple, concise, and easy to read from the student's perspective...a welcome addition to the...references in the fields of neural and fuzzy systems.

SIAM Review Vol. 46, No. 1

Users Review

From reader reviews:

Ismael Black:

Book is to be different for each and every grade. Book for children till adult are different content. We all know that that book is very important for us. The book A First Course in Fuzzy and Neural Control has been making you to know about other know-how and of course you can take more information. It is quite advantages for you. The book A First Course in Fuzzy and Neural Control is not only giving you much more new information but also for being your friend when you really feel bored. You can spend your personal spend time to read your guide. Try to make relationship with all the book A First Course in Fuzzy and Neural Control. You never really feel lose out for everything when you read some books.

Jack Williams:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make these keep up with the era and that is always change and move ahead. Some of you maybe will probably update themselves by reading books. It is a good choice to suit your needs but the problems coming to a person is you don't know what kind you should start with. This A First Course in Fuzzy and Neural Control is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Tasha Banda:

The guide with title A First Course in Fuzzy and Neural Control includes a lot of information that you can understand it. You can get a lot of benefit after read this book. This particular book exist new knowledge the information that exist in this reserve represented the condition of the world now. That is important to you to find out how the improvement of the world. This particular book will bring you with new era of the global growth. You can read the e-book on the smart phone, so you can read it anywhere you want.

Nathan Strong:

That publication can make you to feel relax. This particular book A First Course in Fuzzy and Neural

Control was colorful and of course has pictures on there. As we know that book A First Course in Fuzzy and Neural Control has many kinds or style. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore not at all of book are usually make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading in which.
