Yao and Artusio's Anesthesiology: Problem-Oriented Patient Management

By Fun-Sun F. Yao, Manuel L. Fontes, Vinod Malhotra

Yao and Artusio's Anesthesiology is among the core texts for anesthesiology residents, and is frequently used as one of the primary study aids for the ABA oral boards. The book covers all areas of anesthesia using a problem-based approach. As in prior editions, the goal of the text is to present a group of important clinical entities covering the most critical anesthetic problems, and to provide logical and scientific fundamentals for individualized patient management.

Each chapter is based on a real-world case history and includes questions that address every facet of management—from disease knowledge and differential diagnosis, through preoperative evaluation, intraoperative management, and postoperative care. The discussion of each question is followed by a short list of the most important references on that topic.
