Rechargeable Batteries Applications Handbook (EDN Series for Design Engineers) By Gates Energy Products

Represents the first widely available compendium of the information needed by those design professionals responsible for using rechargeable batteries. This handbook introduces the most common forms of rechargeable batteries, including their history, the basic chemistry that governs their operation, and common design approaches. The introduction also exposes reader to common battery design terms and concepts.

Two sections of the handbook provide performance information on two principal types of rechargeable batteries commonly found in consumer and industrial products: sealed nickel-cadmium and sealed-lead cells. For each type of cell, this book covers discharge performance, charging and charger design, storage, life, applications information, testing, and safety.

- New paperback edition of a best-seller
- First widely-available book on rechargeable cells
- Operation, applications, and testing

Editorial Review

From the Publisher

Two sections of the handbook provide performance information on two principal types of rechargeable batteries commonly found in consumer and industrial products: sealed nickel-cadmium and sealed-lead cells. For each type of cell, this book covers discharge performance, charging and charger design, storage, life, applications information, testing, and safety.

Users Review

From reader reviews:

Kai Martin:

Rechargeable Batteries Applications Handbook (EDN Series for Design Engineers) can be one of your beginning books that are good idea. All of us recommend that straight away because this reserve has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort to place every word into enjoyment arrangement in writing Rechargeable Batteries Applications Handbook (EDN Series for Design Engineers) nevertheless doesn't forget the main level, giving the reader the hottest and based confirm resource data that maybe you can be one among it. This great information may drawn you into brand new stage of crucial considering.

Robyn Pugh:

Within this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple solution to have that. What you need to do is just spending your time not much but quite enough to possess a look at some books. On the list of books in the top checklist in your reading list is definitely Rechargeable Batteries Applications Handbook (EDN Series for Design Engineers). This book that is certainly qualified as The Hungry Inclines can get you closer in getting precious person. By looking upward and review this book you can get many advantages.

Lynnette Jennings:

As a pupil exactly feel bored to be able to reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Rechargeable Batteries Applications Handbook (EDN Series for Design Engineers) can make you experience more interested to read.

Alisa Gordon:

What is your hobby? Have you heard that question when you got college students? We believe that that query was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you know that little person similar to reading or as studying become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to add you knowledge, except your current teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you choose to adopt be your object. One of them is actually Rechargeable Batteries Applications Handbook (EDN Series for Design Engineers).
