**Tiger Tanks at War** By Michael Green, James D. Brown

The first prototype for the Tiger tank was set to be ready for Hitler's birthday on April 20, 1942. The Henschel Company, competing with Porsche, produced the superior model, and by August of that year the formidable Tiger--or Panzerkampfwagen VI Tiger Ausf. H.--was in full production.

This book takes us behind the scenes with the Tiger tank, reviewing the full history, the design and mechanics, and the mixed record of this machine, which was designed to outgun its Russian counterparts. Military writer Michael Green offers a close-up account--accompanied by photographs, diagrams, and maps--of how the Tiger tank operated, how it was armed, and where it succeeded brilliantly, as well as where it failed miserably.

His book fills a fascinating niche in the history of military technology, and of the impact of technology on history itself.

## Editorial Review

Review

### **WWII History, September 2008**

"*Tiger Tanks at War* is filled with photos (scores of high-quality color views of restored tanks at museums and reenactments in the U.S. and Europe) that illustrate many points: the Tiger's design and development, armament, armor, mechanics, operation, performance, strengths, weaknesses, and tactical employment...the authors have done a fine job of providing the reader with a better understanding of how the vehicles and their crews actually functioned in combat. Anyone with an interest in armor will want *Tiger Tanks at War* on their bookshelf."

### **Military Vehicles Magazine, August 2008**

"*Tiger Tanks at War* is a clearly written and well-organized account of the Tiger I and Tiger II tanks...Books on Tiger tanks are plentiful and tend to repeat the same themes and historic photographs. This book has excellent close-up interior photos you won't find elsewhere. Further, it would make a fine introductory book on the subject for a novice Tigerholic, or a handy, information reference for those already conversant in the subject."
