Twelve Theories of Human Nature By Leslie Stevenson, David L. Haberman, Peter Matthews Wright

Over five previous editions, *Ten Theories of Human Nature* has been a remarkably popular introduction to some of the most influential developments in Western and Eastern thought. Now titled *Twelve Theories of Human Nature*, the sixth edition adds chapters on Islam (by Peter Wright) and Freud to those on Confucianism, Hinduism, Buddhism, Plato, Aristotle, the Bible, Kant, Marx, Sartre, and Darwinism. The authors juxtapose the ideas of these and other thinkers and traditions in a way that helps students understand how humanity has struggled to comprehend its nature.

To encourage students to think critically for themselves and to underscore the similarities and differences between the many theories, the book examines each one on four points--the nature of the universe, the nature of humanity, the diagnosis of the ills of humanity, and the proposed cure for these problems.

Ideal for introductory courses in human nature, philosophy, religious studies, and intellectual history, this unique volume will engage and motivate students and other readers to consider how we can understand and improve both ourselves and human society.

Editorial Review

Review

"*Twelve Theories of Human Nature* is the exact model of what an introductory textbook should be: a student coming to the subject for the first time will be able to understand the contentions of different (and difficult) theories of human nature; at the same time, nothing here is dumbed down. The book is consistently clear, precise, deep, engaging, and accurate."--Brian R. Clack, *University of San Diego*

"Excellent. I have been using this book since the first edition. The inclusion of the treatment of evolutionary theories of human nature is particularly valuable."--Val Dusek, *University of New Hampshire*

"I have asked my students often whether they think the text is one they would like me to assign again next semester and they agree again and again. There really is no other better book."--Patricia Turrisi, *University of North Carolina-Wilmington*

"I cannot think of another philosophy text written for the undergraduate on this topic that is as clear, unpretentious, and informative as this book."--Zachary Ernst, *University of Missouri-Columbia*

About the Author

Leslie Stevenson is Honorary Reader in Philosophy, University of St. Andrews, Scotland.

David L. Haberman is Professor of Religious Studies, Indiana University at Bloomington.

Peter Matthews Wright is Assistant Professor of Religion at Colorado College.

Users Review

From reader reviews:

William Grimm:

Information is provisions for people to get better life, information these days can get by anyone from everywhere. The information can be a knowledge or any news even a concern. What people must be consider whenever those information which is from the former life are hard to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you obtain the unstable resource then you have it as your main information there will be huge disadvantage for you. All those

possibilities will not happen with you if you take Twelve Theories of Human Nature as the daily resource information.

Nona Whitehouse:
