**Modern Authentication with Azure Active Directory for Web Applications (Developer Reference)** By Vittorio Bertocci

**Build advanced authentication solutions for any cloud or web environment**

Active Directory has been transformed to reflect the cloud revolution, modern protocols, and today's newest SaaS paradigms. This is an authoritative, deep-dive guide to building Active Directory authentication solutions for these new environments. Author Vittorio Bertocci drove these technologies from initial concept to general availability, playing key roles in everything from technical design to documentation. In this book, he delivers comprehensive guidance for building complete solutions. For each app type, Bertocci presents high-level scenarios and quick implementation steps, illuminates key concepts in greater depth, and helps you refine your solution to improve performance and reliability. He helps you make sense of highly abstract architectural diagrams and nitty-gritty protocol and implementation details. This is the book for people motivated to become experts.

Active Directory Program Manager Vittorio Bertocci shows you how to:

- Address authentication challenges in the cloud or on-premises
- Systematically protect apps with Azure AD and AD Federation Services
- Power sign-in flows with OpenID Connect, Azure AD, and AD libraries
- Make the most of OpenID Connect's middleware and supporting classes
- Work with the Azure AD representation of apps and their relationships
- Provide fine-grained app access control via roles, groups, and permissions
- Consume and expose Web APIs protected by Azure AD
- Understand new authentication protocols without reading complex spec documents

### Editorial Review

#### About the Author

**Vittorio Bertocci** is principal program manager on the Azure Active Directory team, where he works on the developer experience: Active Directory Authentication Library (ADAL), OpenID Connect and OAuth2 OWIN components in ASP.NET, Azure AD integration in various Visual Studio work streams, and other things he can't tell you about (yet). Vittorio joined the product team after years as a virtual member in his role as principal architect evangelist, during which time he contributed to the inception and launch of Microsoft's claims-based platform components (Windows Identity Foundation, ADFS 2.0) and owned SaaS and identity evangelism for the .NET developers community.

Vittorio holds a Master's degree in computer science and began his career doing research on computational geometry and scientific visualization. In 2001 he joined Microsoft Italy, where he focused on the .NET platform and the nascent field of web services security, becoming a recognized expert at the national and European level.

Vittorio is easy to spot at conferences. He has spoken about identity in 23 countries on four continents, from keynote addresses to one-on-one meetings with customers. Vittorio is a regular speaker at Ignite, Build, Microsoft PDC, TechEd (US, Europe, Australia, New Zealand, Japan), TechDays, Gartner Summit, European Identity Conference, IDWorld, OreDev, NDC, IASA, Basta, and many others. At the moment his Channel 9 speaker page at <https://channel9.msdn.com/events/speakers/vittorio-bertocci> lists 44 recordings.

Vittorio is a published author, both in the academic and industry worlds, and has written many articles and papers. He is the author of *Programming Windows Identity Foundation* (Microsoft Press, 2010) and coauthor of "A Guide to Claims-Based Identity and Access Control" (Microsoft patterns & practices, 2010) and *Understanding Windows Cardspace* (Addison-Wesley, 2008). He is a prominent authority and blogger on identity, Azure, .NET development, and related topics: he shares his thoughts at [www.cloudidentity.com](http://www.cloudidentity.com) and via his twitter feed, <http://www.twitter.com/vibronet>.

Vittorio lives in the lush green of Redmond with his wife, Iwona. He doesn't mind the gray skies too much, but every time he has half a chance, he flies to some place on the beach, be it the South Pacific or Camogli, his home town in Italy.

### Users Review

#### From reader reviews:

##### **Jules Thompson:**

This Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is information inside this publication incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This kind of Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) without we know teach the one who reading it become critical in pondering and analyzing. Don't become worry Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) can bring when you are and not make your tote space

or bookshelves' come to be full because you can have it in your lovely laptop even mobile phone. This Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) having great arrangement in word as well as layout, so you will not really feel uninterested in reading.

### **Henry Perry:**

Information is provisions for people to get better life, information currently can get by anyone on everywhere. The information can be a understanding or any news even a huge concern. What people must be consider when those information which is within the former life are challenging to be find than now is taking seriously which one would work to believe or which one the particular resource are convinced. If you receive the unstable resource then you get it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) as your daily resource information.

### **Myra Hackett:**

The e-book with title Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) has lot of information that you can understand it. You can get a lot of gain after read this book. This book exist new expertise the information that exist in this guide represented the condition of the world at this point. That is important to you to understand how the improvement of the world. This kind of book will bring you with new era of the the positive effect. You can read the e-book on your smart phone, so you can read this anywhere you want.

### **Diana Slama:**

Do you have something that you enjoy such as book? The book lovers usually prefer to select book like comic, small story and the biggest you are novel. Now, why not striving Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) that give your pleasure preference will be satisfied by reading this book. Reading habit all over the world can be said as the way for people to know world better then how they react toward the world. It can't be mentioned constantly that reading habit only for the geeky particular person but for all of you who wants to become success person. So , for all of you who want to start studying as your good habit, you may pick Modern Authentication with Azure Active Directory for Web Applications (Developer Reference) become your current starter.
