## Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) By Alexander M. Wyglinski, Di Pu

This unique resource provides you with a practical approach to quickly learning the software-defined radio concepts you need to know for your work in the field. By prototyping and evaluating actual digital communication systems capable of performing over-the-air wireless data transmission and reception, this volume helps you attain a first-hand understanding of critical design trade-offs and issues. Moreover you gain a sense of the actual real-world operational behavior of these systems.

With the purchase of the book, you gain access to several ready-made Simulink experiments at the publisher's website. This collection of laboratory experiments, along with several examples, enables you to successfully implement the designs discussed in the book in a short period of time. These files can be executed using MATLAB version R2011b or later.

Contents: What is SDR? Signal & System Overview. Probability Review. Digital Communications Review. Basic SDR Implementation of a Transmitter and a Receiver. Receiver Structure and Waveform Synthesis of a Transmitter and a Receiver. Multi-Carrier Modulation. Spectrum Sensing Techniques. Synchronization. Appendices.

### **Editorial Review**

#### **About the Author**

Alexander M. Wyglinski is an assistant professor in the Department of Electrical and Computer Engineering at the Worcester Polytechnic Institute. He holds an M.S. in electrical engineering from Queen's University and a Ph.D. in electrical engineering from McGill University.

Di Pu is a research assistant in the Wireless Innovation Laboratory at the Worcester Polytechnic Institute. She holds an M.S. in electrical engineering from the Worcester Polytechnic Institute, where she is currently a Ph.D. candidate.

### **Users Review**

#### **From reader reviews:**

##### **Brooke Jenkins:**

Now a day individuals who Living in the era where everything reachable by match the internet and the resources in it can be true or not need people to be aware of each info they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Reading through a book can help men and women out of this uncertainty Information particularly this Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) book because this book offers you rich details and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it you may already know.

##### **Raymond Hollander:**

The publication untitled Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) is the publication that recommended to you to see. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their way of doing something is easily to understand. The author was did a lot of analysis when write the book, hence the information that they share to your account is absolutely accurate. You also could get the e-book of Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) from the publisher to make you considerably more enjoy free time.

##### **Jack Godina:**

A lot of people always spent their particular free time to vacation or even go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity this is look different you can read a book. It is really fun for you. If you enjoy the book that you just read you can spent all day every day to reading a e-book. The book Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) it is very good to read. There are a lot of individuals who recommended this book.

These folks were enjoying reading this book. Should you did not have enough space to develop this book you can buy typically the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not too costly but this book features high quality.

**Samantha Bond:**

This Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) is completely new way for you who has interest to look for some information mainly because it relief your hunger of information. Getting deeper you on it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this Digital Communication Systems Engineering with Software-Defined Radio (Mobile Communications) can be the light food for yourself because the information inside this kind of book is easy to get by simply anyone. These books develop itself in the form that is certainly reachable by anyone, yep I mean in the e-book form. People who think that in guide form make them feel tired even dizzy this reserve is the answer. So there is no in reading a e-book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the item! Just read this e-book kind for your better life and also knowledge.
