### **Amazon.com Review**

On his deathbed, faced with creditors and unpaid bills, Oscar Wilde said despairingly, "I am dying beyond my means!" If only the poor, beleaguered genius had read this book! None of us gets out of here alive, but reading this book will lessen your fear of the ultimate end and give you some guidance about enjoying your life to the fullest right up until your final moment. Do people really enjoy life in the face of death? People do. The stories of individuals in Dr. Byock's book will move and inspire you to change your feelings about the end of your life, and also your feelings about your life in the present.

### **From Publishers Weekly**

This study of how to die well displays uncommon vitality. Byock, president elect of the American Academy of Hospice and Palliative Care, is a gifted storyteller. Beginning with his own father's terminal illness, he details without scientific cant the process of decline that awaits most of us. The case studies, which form the humanistic soul of this work, never devolve into the maudlin or saccharine. Life on the edge of the great crossing is explored in all its sadness and pathos, but Byock also makes room for wisdom, hope and even the joy of final understanding. By recounting the passages of patients in his Missoula, Mont., practice, Byock makes a forceful case for hospice care and against physician-assisted suicide. He demonstrates how the physical pain and emotional despair of the dying may be handled. The family constellation of the terminally ill is also analyzed, with emphasis on a hospice's ability, through its doctors, nurses, psychologists and social workers, to help those left behind. Not only is this book informative, especially the question-and-answer section at the end, it is also insightful. Readers will sense Byock's personal growth as his understanding of final issues flowers through a 20-year specialization. Byock recalls his growth from a callow resident to a concerned son and, finally, to a healer with a mission. Whether it's the middle-aged mother who must resolve disillusionment with her sister, the bitter father of three who achieves serenity or the gutsy teenage girl with a rare genetic disease, the people whose sojourns Byock recounts receive from him the dignity they merit.

### **From Library Journal**

Many terminally ill people fear that their last days will be spent as burdens to their families, helpless, without dignity, and in unbearable pain. Often, the only alternative to such a death seems to be assisted suicide. In either situation, the dying person and family members are denied the opportunity to make the most of their remaining lives. Byock, a hospice physician practicing in rural Montana, learned well the possibilities for dying while caring for his father, who died from pancreatic cancer during Byock's medical training. This book tells the story of his father's final illness and those of hospice patients Byock has helped through the dying process. Focusing on the clinical, emotional, and spiritual aspects of death, the stories emphasize Byock's unshakable belief that physical and psychological suffering can always be alleviated through the devoted efforts of hospice caregivers. He offers realistic yet compassionate answers to the hard questions asked by dying patients, their families, and a society unwilling to accept that all life eventually comes to an end. Highly recommended for all collections. ?Karen McNally Bensing, Benjamin Rose Inst. Lib., Cleveland
