Fear My Mortality (Mortal Eternity) By Everly Frost

The future is bright for 16-year-old Ava Holland and the residents of Evereach. They don't have to worry about old age or even getting sick. In their world, humans regenerate, heal, and live for hundreds of years. Mortality isn't something to fear. Disease has been all but eradicated. Everything changes when Ava watches her brother die and he doesn't regenerate. Ava's genetics are called into question by the government, scientists, extremists, and Ava herself. Could her genes hold the answer to mortality? Is she an anomaly or something to be feared? Determined not to become anyone's guinea pig, Ava doesn't stick around to find out. She wants answers too, but the only person who can help her is 17-year-old Michael Bradley, the boy who killed her brother. If either of them have even the slightest chance of survival, they must find the genetic keys hidden in Ava's DNA before it's too late.

Editorial Review

From School Library Journal

Gr 8 Up—In a world where humans regenerate and live for centuries, war via death is no longer possible. But when Ava's brother Josh is killed, Ava discovers that she and Josh are mortal; their genetics do not allow them to regenerate. After Josh's murder, Ava barely escapes government agents who aim to study her mortality to create a new weapon of biological warfare. Now on the run, she receives help from the one person she hates the most: Michael, the boy who murdered her brother. Readers who can overlook implausible world-building will be treated to an action-packed sci-fi romance. The story opens with a dramatic car accident, and from there, the action rarely slows. But teens will really have to suspend disbelief, as the premise simply does not make sense. According to the narrator, no one, not even her 300-year-old neighbor, can remember a time when humans could die from illness or injury. This suggests a setting that is centuries into the future. So why are people still living in modern suburbs and using current-day cars and technology? If no one dies, why isn't there a population problem? Are animals also immortal? And, most important, how can the protagonist feel anything but hatred for the boy who murdered her beloved brother? VERDICT Readers will have to ignore serious stretches in plausibility to enjoy this otherwise entertaining story. Give this to fans of Lissa Price's Starters and Bethany Wiggins's Stung.—Leigh Collazo, Dulwich College, Suzhou, China

About the Author

Everly Frost once wore a t-shirt with "geek girl" on it and felt right at home in it. She loves soaring forests, brilliant sunrises, and clouds that form the shapes of dragons. For whatever reason, she never finishes a cup of coffee.
