## Handbook of Nanomagnetism: Applications and Tools From Pan Stanford

This unique handbook compiles and details cutting-edge research in nanomagnetism and its applications in spintronics, magnetoplasmonics, and nonlinear magneto-optics. Fundamental aspects of magnetism relevant to nanodevices and new spin-transfer torque random-access memory (STT-RAM), current-induced domain wall motion memory, and spin torque oscillators, as well as highly anisotropic materials and topics on magnetization damping are developed in detail in the book. New paradigms such as molecule-based magnets (MBMs), which are a promisingly adaptive class of solids poised to open new frontiers of exploration, are also covered.

The relationship between magnetism and nonlinear optics and the new field of magnetoplasmonics is also developed in detail. The book also includes a thorough chapter on spin-polarized scanning tunneling microscopy (SP-STM), which enables studying magnetic phenomena on surfaces with real-space imaging and spectroscopy techniques down to the atomic level. All these topics are developed by an interdisciplinary team of leading experts in their pertinent fields. The book will certainly appeal to anyone involved in nanomagnetism and its application in spintronic nanodevices and nonlinear magneto-optics.

### **Editorial Review**

#### **About the Author**

**Rosa Alejandra Lukaszew** has been working in experimental condensed matter physics since the mid-nineties. Her field of research comprises thin films and nanostructures, and aspects of her work have been devoted to magnetic thin films and nanostructures spanning magnetic anisotropy, multilayer engineering, spin-dependent tunneling, and magnetoplasmonics. She has secured significant funding from several US national agencies (DOE, DARPA, DTRA, and NSF) for her past and ongoing research projects. She has collaborated and continues to collaborate with leading experts in the field, many of whom are contributors to this book. She has also been an active member of the Magnetic Interfaces and Nanostructures Division of the American AVS. Dr. Lukaszew has published over 100 articles in peer-reviewed journals and has presented many invited talks at several international conferences.

#### **From reader reviews:**

##### **Carolyn Hoffman:**

Reading a e-book tends to be new life style within this era globalization. With reading you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can certainly share their idea. Publications can also inspire a lot of people. Many author can inspire their own reader with their story as well as their experience. Not only the storyline that share in the publications. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on earth always try to improve their talent in writing, they also doing some analysis before they write with their book. One of them is this Handbook of Nanomagnetism: Applications and Tools.

##### **Gloria Taylor:**

Spent a free time to be fun activity to do! A lot of people spent their down time with their family, or their own friends. Usually they carrying out activity like watching television, planning to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? Might be reading a book might be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the e-book untitled Handbook of Nanomagnetism: Applications and Tools can be excellent book to read. May be it could be best activity to you.

##### **Rigoberto Adams:**

Playing with family within a park, coming to see the sea world or hanging out with close friends is thing that

usually you could have done when you have spare time, then why you don't try point that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Handbook of Nanomagnetism: Applications and Tools, you are able to enjoy both. It is very good combination right, you still would like to miss it? What kind of hang-out type is it? Oh come on its mind hangout guys. What? Still don't have it, oh come on its called reading friends.

**Lewis Farnsworth:**

With this era which is the greater individual or who has ability in doing something more are more treasured than other. Do you want to become among it? It is just simple approach to have that. What you should do is just spending your time very little but quite enough to have a look at some books. One of the books in the top listing in your reading list is usually Handbook of Nanomagnetism: Applications and Tools. This book that is qualified as The Hungry Mountains can get you closer in becoming precious person. By looking right up and review this guide you can get many advantages.
