Scientific Writing and Communication: Papers, Proposals, and Presentations By Angelika Hofmann

Scientific Writing and Communication: Papers, Proposals, and Presentations, Third Edition, covers all the areas of scientific communication that a scientist needs to know and master in order to successfully promote his or her research and career. This unique "all-in-one" handbook begins with a discussion of the basic principles of scientific writing style and composition and then applies these principles to writing research papers, review articles, grant proposals, research statements, and résumés, as well as to preparing academic presentations and posters.

FEATURES

A practical presentation carefully introduces basic writing mechanics before moving into manuscript planning and organizational strategies. Extensive hands-on guidance for composing scientific documents and presentations then follows.

Relevant and multidisciplinary examples selected from real research papers and grant proposals by writers ranging from students to Nobel Laureates illustrate clear technical writing and common mistakes that one should avoid.

Annotated text passages bring the writing principles and guidelines to life by applying them to real-world, relevant, and multidisciplinary examples.

Extensive end-of-chapter exercise sets provide the opportunity to review style and composition principles and encourage readers to apply them to their own writing.

Writing guidelines and revision checklists warn scientists against common pitfalls and equip them with the most successful techniques to revise a scientific paper, review article, or grant proposal.

The book's clear, easy-to-follow writing style appeals to both native and non-native English speakers; special ESL features also point out difficulties experienced primarily by non-native speakers.

Tables and lists of sample sentences and phrases aid in composing different sections of a scientific paper, review article, or grant proposal.

Thorough attention to research articles advises readers on composing successful manuscripts for publication in peer-reviewed journals from initial drafting to the response to reviewers.

Comprehensive coverage of grant writing guides scientists through the entire process of applying for a grant, from the initial letter of inquiry to proposal revision and submission.

Editorial Review

Review

"This is the first and last scientific writing book students will need in order to be successful! It is amazingly comprehensive, and students will be able to use it as they move through their college classes and into their careers."--Melanie Lee-Brown, *Guilford College*

"Hofmann's text is a concise, spritely written approach to scientific writing that focuses like a laser on the most critical and difficult skills to master, including style, tone, cohesion, and details of structure."--Shana Walton, *Nicholls State University*

"This book is simply the most comprehensive, helpful book available for scientific writing."--Brian Schilling, *University of Memphis*

"This is a clearly written and comprehensive guide to scientific writing that shows authors how to use structure and style to convey their research clearly to readers. Because the book also contains chapters on grant proposals, posters and talks, and job applications, it is a useful career development tool for students and postdocs alike." --Brian Waters, *University of Nebraska*

About the Author

Renowned in the world of scientific communication, she is the founder of "SciWri Services," a venture that provides consulting and editing services as well as workshops at universities around the world.

Users Review

From reader reviews:

Cameron Keller:

Book is usually written, printed, or highlighted for everything. You can understand everything you want by a publication. Book has a different type. As you may know that book is important matter to bring us around the world. Close to that you can your reading skill was fluently. A e-book Scientific Writing and Communication: Papers, Proposals, and Presentations will make you to be smarter. You can feel considerably more confidence if you can know about everything. But some of you think that will open or

reading any book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you looking for best book or acceptable book with you?

David Robinson:

Nowadays reading books become more than want or need but also be a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of publication you read, if you want attract knowledge just go with education books but if you want truly feel happy read one with theme for entertaining such as comic or novel. Often the Scientific Writing and Communication: Papers, Proposals, and Presentations is kind of reserve which is giving the reader capricious experience.

Tracy Lindsey:

The publication with title Scientific Writing and Communication: Papers, Proposals, and Presentations posseses a lot of information that you can discover it. You can get a lot of profit after read this book. This kind of book exist new expertise the information that exist in this reserve represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. This specific book will bring you with new era of the globalization. You can read the e-book in your smart phone, so you can read it anywhere you want.

Kenneth Salinas:

This Scientific Writing and Communication: Papers, Proposals, and Presentations is great book for you because the content which can be full of information for you who all always deal with world and still have to make decision every minute. This kind of book reveal it details accurately using great organize word or we can state no rambling sentences in it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only provides you with straight forward sentences but hard core information with wonderful delivering sentences. Having Scientific Writing and Communication: Papers, Proposals, and Presentations in your hand like keeping the world in your arm, facts in it is not ridiculous 1. We can say that no book that offer you world throughout ten or fifteen small right but this e-book already do that. So , it is good reading book. Hey Mr. and Mrs. stressful do you still doubt this?
