Editorial Review

Review

“All in all, the book would be a valuable addition for those seeking further information about canine reproduction, rather than a practical manual for veterinary surgeons, which may be found in some of Dr England’s other published work.” (*Australian Veterinary Journal*, 28 October 2013)

“I believe that the author has made a major contribution to the veterinary literature with this book. It is a useful, one-of-a-kind clinical handbook that is well worth the price and should be on the shelf of any veterinarian, veterinary student, or breeder who is involved or interested in the reproductive management of dogs.” (*Journal of The American Veterinary Medical Association*, 15 March 2013)

“This is a valuable addition to any clinician’s or student’s library, as it is a very detailed, easy-to-read book covering the aspects of canine reproduction that a veterinary surgeon is likely to come across in day-to-day general practice.” (*Veterinary Practice News*, 1 September 2013)

“Gary England is himself a veterinarian specializing in animal reproduction and has worked with dogs for 25 years: his clinical experience blends with his published works to make for an important wide-ranging consideration of normal and abnormal reproduction and techniques, and is a pick for any veterinary collection.” (*Midwest Book Reviews*, 1 May 2013)

“This is an excellent, easily read textbook, which is a ‘must have’ for veterinary students, where in many UK veterinary schools the discipline of clinical reproduction has been neglected in the undergraduate curriculum in recent years, particularly compared with those in mainland Europe and the USA. It will also be a useful addition to required reading for veterinary nurses and, without doubt, serious dog breeders.” (*Veterinary Record*, 6 April 2013)

From the Back Cover

Dog Breeding, Whelping and Puppy Care is a practical and up-to-date guide to canine reproduction for dog breeders, veterinary students and veterinary surgeons. Written in an easy-to-use style and presented in a practically useful format with clear illustrations. The information is supported by references from the author’s published work and his wealth of clinical experience to form the important authoritative text in this field. A vital aid to those seeking an understanding of normal and abnormal reproduction as well as common reproductive techniques.

About the Author

Gary England is a veterinarian specialising in animal reproduction who has worked in clinical practice and research of dog breeding for 25 years. He is Professor of Comparative Veterinary Reproduction at the University of Nottingham and has published more than 100 scientific articles and numerous book chapters and reviews in the area. He is Diplomate of the American College of Theriogenology and the European College of Animal Reproduction, as well as being an RCVS Recognised Specialist in Veterinary

Reproduction. Drawing on his extensive research and clinical experience, this book represents his view of the subject area, and includes references to his own peer-reviewed publications demonstrating the impact of his contribution to the field.

Users Review

From reader reviews:

Betty Epperson:
