Health Physics and Radiological Health By Thomas E. Johnson, Brian K. Birky

This text is an invaluable, comprehensive data reference for anyone involved in health physics or radiation safety. This new edition addresses the specific data requirements of health physicists, with data presented in large tables, including the latest NCRP recommendations, which are tabulated and given in both SI and traditional units for ease of use. Although portions of these data can be obtained from various internet sites, many are obscure, difficult to navigate and/or have conflicting information for even the most common data, such as specific gamma ray constants. This new edition compiles all essential data in this vast field into one user-friendly, authoritative source. It also offers a website with full-text search capability.

Editorial Review

Review

"Interestingly, it is the 1970 version of the handbook that is most frequently sought after. This edition preserves the essential content and dramatically expands on it. Other handbooks with subsets of this information are available along with online sources, but the completeness of this single volume makes it valuable. The extent of data it includes for diagnostic medical imaging and radiation therapy makes me wonder if it is better suited for medical physicists than health physicists. This is not truly a limitation of the book, however, because it increases its utility and potential audience. My old copy of the 1970 handbook is worn and tattered, and I've purchased an electronic copy of it because I wasn't willing to give it up. I fully expect that this new edition will become a similarly treasured reference and will be dog-eared and ragged on the shelves of many health and medical physicists. Perhaps more importantly, it will be an often-clicked bookmark in many browsers."

- Doody's Book Review (November 2012)
Douglas E Pfeiffer, MS(Boulder Community Hospital)

"This book adds the "next milestone" to the continuum begun by the original Radiological Health Handbook, circa 1950. This update is a welcome comprehensive data reference for anyone involved in the practice of health physics."

Health Physics Reviews (January, 2013)
Stephen V. Musolino, Ph.D, CHP (Brookhaven National Library)

Users Review

From reader reviews:

Ronald Castaneda:

The book Health Physics and Radiological Health make one feel enjoy for your spare time. You can utilize to make your capable more increase. Book can to get your best friend when you getting stress or having big problem with the subject. If you can make reading through a book Health Physics and Radiological Health for being your habit, you can get a lot more advantages, like add your current capable, increase your knowledge about several or all subjects. You can know everything if you like available and read a publication Health Physics and Radiological Health. Kinds of book are a lot of. It means that, science guide or encyclopedia or others. So , how do you think about this publication?

Susan Gagnon:

Reading can called thoughts hangout, why? Because when you find yourself reading a book particularly book entitled Health Physics and Radiological Health your mind will drift away trough every dimension, wandering in each and every aspect that maybe unknown for but surely might be your mind friends. Imaging every single word written in a publication then become one web form conclusion and explanation this maybe you never get before. The Health Physics and Radiological Health giving you yet another experience more than blown away your thoughts but also giving you useful information for your better life with this era. So now let us teach you the relaxing pattern this is your body and mind will likely be pleased when you are finished studying it, like winning a. Do you want to try this extraordinary investing spare time activity?

Gregory Howard:

Reading a book to get new life style in this year; every people loves to learn a book. When you learn a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your research, you can read education books, but if you want to entertain yourself read a fiction books, this kind of us novel, comics, in addition to soon. The Health Physics and Radiological Health provide you with new experience in reading through a book.

Wm Schroeder:

What is your hobby? Have you heard that will question when you got learners? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you know that little person just like reading or as reading through become their hobby. You need to understand that reading is very important and also book as to be the issue. Book is important thing to provide you knowledge, except your current teacher or lecturer. You find good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them is niagra Health Physics and Radiological Health.
