Written by Ronald L. Taylor, from Metropolitan State College in Denver, this edition's new study guide combines the previous study guide and student workbook to supply chapter outlines, general rules and limitations on the rules, examples, and study hints. In addition, objective questions and case problems assist students in reviewing terms and applying concepts learned in each chapter. Students' comprehension is reinforced by reviewing the concepts and applying them to factual situations, and through a variety of learning exercises including true/false questions, fill-in-the-blank statements, yes/no questions, questions referring to fact situations, and definition exercises.
