**The Age of Improvement, 1783-1867 (2nd Edition)** By Asa Briggs

*The Age of Improvement* has long established itself as a classic of modern historical writing. Widely read and quoted it has had a unique influence on teaching and research. This second edition draws on the great volume of new research - produced by Lord Briggs amongst others, since its original publication. The book stresses both the underlying unity and the rich variety of the age, and raises fundamental issues about a period of crucial change in British history - industrialisation, war, constitutional change and the attitudes of politicians towards it, political development, and, not least, society and culture. In the background are the new economic powers based on the development of a coal and iron technology; in the foreground, new social and political problems and new ways of tackling them. The author also discusses perceptions of, and reactions to, changing circumstances, the influence of religion and science on national life, and changing styles in art and literature. The story ends, not with a full stop but with a question mark. Could improvement be maintained? Could balance and progress continue to be reconciled?

## **Editorial Review**

### Review

'An excellent account of one major aspect of English history.'

*Economic History Review*

"An accessible, straightforward and perceptive introduction to late Hanoverian and early Victorian British History." Miles Taylor, King's College, London

### From the Back Cover

"He takes for granted that there is only one history of England and not a basic course of political and party history with a few side-dishes on social conditions, literature, the arts, etc."

*Eric Hobsbawm, New Statesman*

"An excellent account of one major aspect of English history. It is in the mingling of political and social history so that each adds depth to the other that Professor Briggs's great strength and individuality are found..."

*Economic History Review*

"The title alone is enough to recommend it"

*Catholic Herald*

The Age of Improvement was first published in hardback in 1959 as part of Longman's prestigious A History of England series before being reissued in paperback in 1979. This remarkable book has long established itself as a classic of modern historical writing. With sales now reaching almost 100,000 copies the book has been very widely read and quoted and has had a unique influence on teaching and research. Now, a further twenty years on, the book has been thoroughly revised and updated throughout - it is sure to be welcomed by a new generation of readers.

The Second Edition draws on the great volume of new research since the book first appeared - not least in the now flourishing field of Victorian Studies. Lord Briggs has made his own substantial contribution to this new research, reflected in his prodigious list of publications covering local history, history from below, the history of cities, the history of food and drink, the history of health, and the history of things.

### About the Author

ASA BRIGGS is one of the most highly respected British historians. He is the author of Victorian People, Victorian Cities and Victorian Things. He has also written a five-volume history of broadcasting in the United Kingdom. He was made a life peer in 1976.
