The Money Bubble By James Turk, John Rubino

In their 2004 book *The Coming Collapse of the Dollar*, James Turk and John Rubino advised readers to bet against the housing bubble before it popped and to buy gold before it soared. Those were literally the two best investment ideas of the decade. Now Turk and Rubino are back to say that history is about to repeat. Instead of addressing the causes of the 2008 financial crisis, the world's governments have continued along the same path, accumulating even more debt and inflating even bigger financial bubbles. So another -- even bigger -- crisis is coming. Whether it ends up being called a "crack-up boom" or "the End of Paper Money" or "the Second Great Depression," it will change everything, from the kinds of investments that create new fortunes to the kinds of money that most of us save and spend. Among many other things, the authors explain:

- How governments are hiding the scope of the problems they face.
- Why the world's paper currencies will soon stop functioning as money.
- How you can protect your savings from the threats posed by this transition from "unsound" paper currencies to "sound" money like gold and silver.
- How you can actually make money -- perhaps a lot of it -- during this transition.

"Because the Money Bubble involves the world's major currencies rather than just a discrete asset class like houses or tech stocks, its bursting will be both far more devastating for the unprepared and far more profitable for those able to understand it and act accordingly. Our goal is to usher you into this small but happy second group."

Editorial Review

Review

"The best book I've read on the history of money, where we are now, and what it all means for your future."
(*Daniel Ameduri, Future Money Trends*)

"Turk and Rubino have done it again! Crisp writing and excellent storytelling illuminate the causes of our inevitable monetary crisis."

(*Chris Martenson, Ph.D. & Adam Taggart, PeakProsperity.com*)

"I wholeheartedly endorse the *Money Bubble*'s main thesis that a major currency crisis is coming and you need to protect yourself from it. Two thumbs up." (Mike Shedlock, *Mish's Global Economic Trend Analysis*)

"Turk and Rubino are definitely not "fringe" characters. They have worked with one foot in the mainstream for many years. But they have remained independent and unencumbered by an establishment that has selfishly thumbed its nose at honest money in favor of a monetary system that transfers wealth from those who make it to parasitic bankers and politicians who consume it. If you really want to know why we are in trouble, what is likely to happen and how you can protect yourself "The Money Bubble" is a must read!"
(*Jay Taylor, J. Taylor's Gold, Energy & Tech Stocks Newsletter*)

"An enthralling book." (*Dominic Frisby, Frisby's Bulls & Bears*)
