Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards By Morton Lippmann, Beverly S. Cohen, Richard B. Schlesinger

This is a broad, in-depth introduction to a scientific field that is becoming ever more central to human health. Environmental exposures to a bewildering array of chemical and physical agents result from our individual and collective activities, and can cause effects ranging from discomfort through loss of function, illness, chronic diseases, and premature death. Their concomitant effects on quality of life, productivity, and need for clinical services can be costly. The book covers the terminology used in environmental health; the sources of chemical and physical agents in the environment; how they disperse and transform throughout the environment; their effects on environmental quality and human health; how levels and exposures are quantified; how standards are established; how levels, exposures, and risks can be controlled; and what technological opportunities and trends are likely to influence our environmental future. It includes chapters on noise, ionizing radiation, non-ionizing radiation, risk assessment, and risk management. Written in a clear and systematic way, this text will be an invaluable resource for students of environmental health.

An earlier version of the book, *Chemical Contamination in the Human Environment* (OUP 1979), was called by one teacher "visionary...easily the most useful textbook in environmental health science for entry-level graduate students."

Editorial Review

About the Author

Morton Lippmann is at New York University. Beverly S. Cohen is at NYU-EPA Pm Center, New York School of Medicine.

Users Review

From reader reviews:

Randy North:

A lot of people always spent their free time to vacation as well as go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity that's look different you can read any book. It is really fun in your case. If you enjoy the book that you read you can spent the entire day to reading a e-book. The book Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards it is extremely good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In case you did not have enough space to deliver this book you can buy the e-book. You can m0ore quickly to read this book from a smart phone. The price is not to fund but this book offers high quality.

Keith Kuhlman:

Your reading sixth sense will not betray you actually, why because this Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards publication written by well-known writer whose to say well how to make book which might be understand by anyone who else read the book. Written within good manner for you, leaking every ideas and creating skill only for eliminate your own personal hunger then you still hesitation Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards as good book not merely by the cover but also through the content. This is one publication that can break don't determine book by its include, so do you still needing an additional sixth sense to pick this specific!? Oh come on your looking at sixth sense already told you so why you have to listening to one more sixth sense.

Wiley Wagner:

That reserve can make you to feel relax. That book Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards was bright colored and of course has pictures on there. As we know that book Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards has many kinds or variety. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you

personally and try to like reading that.

Cheryl Crockett:

As a student exactly feel bored to reading. If their teacher requested them to go to the library or to make summary for some publication, they are complained. Just tiny students that has reading's heart and soul or real their hobby. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards can make you experience more interested to read.
