## **Field Experiments and Their Critics: Essays on the Uses and Abuses of Experimentation in the Social Sciences (The Institution for Social and Policy Studies) From Yale University Press**

In recent years, social scientists have engaged in a deep debate over the methods appropriate to their research. Their long reliance on passive observational collection of information has been challenged by proponents of experimental methods designed to precisely infer causal effects through active intervention in the social world. Some scholars claim that field experiments represent a new gold standard and the best way forward, while others insist that these methods carry inherent inconsistencies, limitations, or ethical dilemmas that observational approaches do not. This unique collection of essays by the most influential figures on every side of this debate reveals its most important stakes and will provide useful guidance to students and scholars in many disciplines.

## **Editorial Review**

Review

"An excellent book on a subject that lies at the center of current methodological debates in the social sciences. The volume brings together many of the leading protagonists and antagonists (i.e., skeptics) of the experimental method and in the process illustrates the strengths, and the limitations, of this powerful method. Astute and readable. Highly recommended."—John Gerring, author of *Social Science Methodology: A Unified Framework*

(John Gerring)

"Advocates and critics of experimental methods debate vigorously in this exceptionally important set of essays. Neither scholars nor policy makers can remain aloof from this great debate; all will be rewarded by a close reading of this indispensable and engaging guide to the core questions of our discipline." - David Waldner, author of *State Building and Late Development*

(David Waldner)

As a university student exactly feel bored in order to reading. If their teacher asked them to go to the library as well as to make summary for some guide, they are complained. Just minor students that has reading's heart or real their pastime. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading really. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Field Experiments and Their Critics: Essays on the Uses and Abuses of Experimentation in the Social Sciences (The Institution for Social and Policy Studies) can make you really feel more interested to read.
