Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving By Stormy Attaway Ph.D. Boston University

MATLAB: A Practical Introduction to Programming and Problem Solving, Fourth Edition, has been updated to reflect the functionality of the current version of MATLAB, including the new H2 Graphics system. It features new and revised end-of-chapter exercises, more engineering applications to help the reader learn this software tool in context, and a new section on object-oriented programming in MATLAB. MATLAB has become the standard software tool for solving scientific and engineering problems due to its powerful built-in functions and its ability to program.

Assuming no knowledge of programming, this book guides the reader both programming and built-in functions to easily exploit MATLAB's extensive capabilities for tackling engineering problems. The book starts with programming concepts, such as variables, assignments, and selection statements, moves on to loops, and then solves problems using both the programming concept and the power of MATLAB. In-depth coverage is given to input/output, a topic fundamental to many engineering applications.

- Presents programming concepts and MATLAB built-in functions side-by-side
- Offers a systematic, step-by-step approach, building on concepts throughout the book and facilitating easier learning
- Includes sections on common pitfalls and programming guidelines to direct students toward best practices
- Combines basic programming concepts, built-in functions, and advanced topics for problem solving with MATLAB to make this book uniquely suitable for a wide range of courses teaching or using MATLAB across the curriculum

Editorial Review

Users Review

From reader reviews:

Debra Richardson:

The book Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving make one feel enjoy for your spare time. You can utilize to make your capable considerably more increase. Book can to get your best friend when you getting tension or having big problem along with your subject. If you can make examining a book Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving being your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You can know everything if you like start and read a guide Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving. Kinds of book are a lot of. It means that, science publication or encyclopedia or other people. So , how do you think about this guide?

Robert Shaw:

What do you concerning book? It is not important with you? Or just adding material when you require something to explain what your own problem? How about your free time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have free time? What did you do? Everyone has many questions above. They have to answer that question since just their can do that will. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on guardería until university need this kind of Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving to read.

Kathryn Cortez:

This Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving are usually reliable for you who want to certainly be a successful person, why. The main reason of this Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving can be one of several great books you must have is usually giving you more than just simple reading through food but feed anyone with information that maybe will shock your earlier knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions throughout the e-book and printed people. Beside that this Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving forcing you to have an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we know it useful in your day pastime. So , let's have it appreciate reading.

Rose Engle:

In this particular era which is the greater person or who has ability to do something more are more precious than other. Do you want to become one among it? It is just simple way to have that. What you are related is just spending your time very little but quite enough to possess a look at some books. On the list of books in the top record in your reading list is actually Matlab, Fourth Edition: A Practical Introduction to Programming and Problem Solving. This book which is qualified as The Hungry Hills can get you closer in turning into precious person. By looking upward and review this guide you can get many advantages.
