Scientism and Education By Emery J. Hyslop-Margison, Ayaz Naseem

This volume offers a critical examination of the growing pressure to apply scientific principles as a means to improve education. The authors trace the ideology of scientism to the early faith Auguste Comte placed in science and the scientific method as a panacea to all human problem solving. By revealing many of the epistemological problems confronted by the social sciences, including education, the authors undermine the prevailing view that a science of education is possible or desirable. Besides revealing the epistemological problems associated with education research, they suggest that the instrumentalism and micro level responsibility related to scientism in education constitute a manipulative ideological smokescreen to distract public attention away from the structural inequities that generate disparate academic outcomes among students in industrialized democracies. The book deals a severe blow to the belief that science is a suitable lens through which to view or strengthen educational practice. 'One begins this book with the skeptical belief that it can't be right. The task of reading, then, is to locate where Hyslop-Margison goes wrong to reach his radical and disturbing conclusions. At the very least, even the most skeptical will have to recognize that the unsayable—that current educational research has proven largely fruitless for discernable reasons—is certainly plausible. He brilliantly brings an issue that has been considered too eccentric to contemplate into the heart of current educational discourse. Everyone concerned with educational research—researchers and those policy-makers, administrators, and other educational workers who draw on the products of educational research should read this important book carefully.' Kieran Egan, Faculty of Education, Simon Fraser University

Editorial Review

From the Back Cover

This volume offers a critical examination of the growing pressure to apply scientific principles as a means to improve education. The authors trace the ideology of scientism to the early faith Auguste Comte placed in science and the scientific method as a panacea to all human problem solving.

By revealing many of the epistemological problems confronted by the social sciences, including education, the authors undermine the prevailing view that a science of education is possible or desirable. Besides revealing the epistemological problems associated with education research, they suggest that the instrumentalism and micro level responsibility related to scientism in education constitute a manipulative ideological smokescreen to distract public attention away from the structural inequities that generate disparate academic outcomes among students in industrialized democracies. The book deals a severe blow to the belief that science is a suitable lens through which to view or strengthen educational practice.

"One begins this book with the skeptical belief that it can't be right. The task of reading, then, is to locate where Hyslop-Margison goes wrong to reach his radical and disturbing conclusions. At the very least, even the most skeptical will have to recognize that the unsayable?that current educational research has proven largely fruitless for discernable reasons?is certainly plausible. He brilliantly brings an issue that has been considered too eccentric to contemplate into the heart of current educational discourse. Everyone concerned with educational research?researchers and those policy-makers, administrators, and other educational workers who draw on the products of educational research should read this important book carefully."

Users Review

From reader reviews:

Jose Bell:

Nowadays reading books be than want or need but also be a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book that improve your knowledge and information. The data you get based on what kind of reserve you read, if you want get more knowledge just go with education books but if you want really feel happy read one with theme for entertaining including comic or novel. Often the Scientism and Education is kind of book which is giving the reader unstable experience.

Allen Schlemmer:

Reading a book tends to be new life style on this era globalization. With reading through you can get a lot of information that may give you benefit in your life. Having book everyone in this world may share their idea.

Guides can also inspire a lot of people. Plenty of author can inspire their own reader with their story as well as their experience. Not only the story that share in the guides. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their expertise in writing, they also doing some investigation before they write for their book. One of them is this Scientism and Education.

Sunday Richey:

This Scientism and Education is great guide for you because the content that is certainly full of information for you who always deal with world and also have to make decision every minute. That book reveal it data accurately using great plan word or we can point out no rambling sentences included. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but hard core information with attractive delivering sentences. Having Scientism and Education in your hand like obtaining the world in your arm, information in it is not ridiculous one particular. We can say that no publication that offer you world with ten or fifteen moment right but this guide already do that. So , it is good reading book. Heya Mr. and Mrs. stressful do you still doubt which?

Robert Shaw:

Reading a book to get new life style in this season; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read publications, you can improve your knowledge, since book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you need to get information about your research, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, along with soon. The Scientism and Education offer you a new experience in looking at a book.
