

# Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional

By Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis

**Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional** By Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis

The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm. *Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional* is the first book to comprehensively introduce the service from a developer perspective, showing you how you can integrate mapping features into your Rails-driven web applications.

Proceeding far beyond simplistic map display, youll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER/Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world.

The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations, adding comments, and building community-driven maps. Youll want to pick up a copy of this book because

- This is the first book to comprehensively introduce the Google Maps application development using the Rails development framework.
- Youll be introduced to the very latest changes to the Google Maps API, embodied in the version 2 release.
- It is written by four developers actively involved in the creation of location-based mapping services.

### Editorial Review

#### About the Author

**Andre Lewis** has been working with technology for the last nine years. His experience ranges from large-scale enterprise consulting with Accenture to startup ventures and open source projects. During "Web 1.0," Andre helped architect coolboard.com, one of the top 50 trafficked Internet sites in 2000. He currently runs his own business, developing Ruby on Rails applications and consulting on Web 2.0 technologies. He also runs hotspotr.com, a community-driven site for WiFi cafes. He blogs about technology, work, and general interests at <http://earthcode.com>. From time to time, Andre gives presentations to San Francisco-area technology groups, including SDForum and the SF Ruby meetup. Andre lives and works in San Francisco, California. When he's not working with clients or exploring the latest technologies, he likes to mountain bike, camp, and ride his motorcycle.

**Cameron Turner** has been programming computers since his first VIC 20 at age 7. He has been developing interactive web sites since 1994. In 1999, he cofounded We-Create, Inc., which specializes in Internet software development. He is now the company's chief technology officer. Cam obtained his honors degree in computer science from the University of Waterloo, Canada, with specialization in applied cryptography, database design, and computer security.

Cam lives in Canada's technology capital of Waterloo, Ontario, with his wife, Tanya, son, Owen, and dog, Katie. His hobbies include biking, hiking, water skiing, and painting. He maintains a personal blog at [CamTurner.com](http://CamTurner.com), discussing non-technical topics, thoughts, theories, and family life.

**Jeffrey Sambells**?is a graphic designer and self-taught web applications developer best known for his unique ability to merge the visual world of graphics with the mental realm of code. With a bachelor of technology degree in graphic communications management along with a minor in multimedia, Jeffrey was originally trained for the traditional paper-and-ink printing industry, but he soon realized the world of pixels and code was where his ideas would prosper. In late 1999, he cofounded We-Create, Inc., an Internet software company based in Waterloo, Ontario, which began many long nights of challenging and creative innovation. Currently, as director of research and development for We-Create, Jeffrey is responsible for investigating new and emerging Internet technologies and integrating them using web standards-compliant methods. In late 2005, he also became a Zend Certified Engineer. When not playing at the office, Jeffrey enjoys a variety of hobbies from photography to woodworking. When the opportunity arises, he also enjoys floating in a canoe on the lakes of Algonquin Provincial Park or going on an adventurous, map-free, drive with his wife. Jeffrey also maintains a personal website at [JeffreySambells.com](http://JeffreySambells.com), where he shares thoughts, ideas, and opinions about web technologies, photography, design, and more. He lives in Ontario, Canada, eh, with his wife, Stephanie, his daughter, Addison, and their little dog, Milo.

**Michael Purvis** is a mechatronics engineering student at the University of Waterloo, Ontario. He is a mostly self-taught programmer. Prior to discovering PHP, he was busy making a LEGO Mindstorms kit play Connect 4. Currently, he maintains an active community site for classmates, built mostly from home-brewed extensions to PunBB and MediaWiki. He has written about CSS for the Position Is Everything web site, and occasionally participates in the css-discuss mailing list. He particularly enjoys those clever layouts that mix negative margins, relative positioning, and bizarre float tricks to create fiendish, cross-browser, flexible-

width concoctions. These and other non-technical topics are discussed on his weblog at UWmike.com. Offline, he enjoys cooking, cycling, and social dancing. He has worked for We-Create, Inc. on a number of exciting PHP-based projects and has a strong interest in independent web standards.

## **Users Review**

### **From reader reviews:**

#### **Donald Rose:**

What do you regarding book? It is not important with you? Or just adding material when you really need something to explain what you problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They need to answer that question due to the fact just their can do that. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this specific Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional to read.

#### **Edward Capps:**

This Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional is great e-book for you because the content and that is full of information for you who always deal with world and also have to make decision every minute. This particular book reveal it details accurately using great arrange word or we can point out no rambling sentences in it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but tricky core information with splendid delivering sentences. Having Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional in your hand like obtaining the world in your arm, information in it is not ridiculous 1. We can say that no reserve that offer you world inside ten or fifteen second right but this reserve already do that. So , this can be good reading book. Hi Mr. and Mrs. stressful do you still doubt this?

#### **Thomas Hodge:**

Reading a book for being new life style in this year; every people loves to learn a book. When you learn a book you can get a lot of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, along with soon. The Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional provide you with new experience in reading through a book.

#### **Edward Orr:**

You can find this Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional by check out the bookstore or Mall. Just simply viewing or reviewing it may to be your solve trouble if you get difficulties on your knowledge. Kinds of this publication are various. Not only by written or printed but

in addition can you enjoy this book by means of e-book. In the modern era such as now, you just looking because of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose suitable ways for you.
