## Model Aircraft Aerodynamics By Martin Simons

Presents standard aerodynamic theory, as applied to model flight, in a concise and practical form. An excellent introduction to aerodynamics not only for model flying enthusiasts but also for those concerned with full-scale light and ultralight aircraft and sailplanes, remotely piloted surveillance and research aircraft, wind surfers and land yachts, and the designers of wind turbines. Revised and updated to reflect significant developments in model aircraft. 4th ed.

### **Editorial Review**

#### **About the Author**

Martin Simons' interest in aviation goes back more than sixty years. He remains actively involved in designing, building and flying model aircraft and full-scale sailplanes. Born in England in 1930, he now lives in Australia where for twenty-five years he was a senior lecturer in education at the University of Adelaide. He has published numerous articles and several books on model flying and was the editor of Australian Gliding magazine for ten years.

### **Users Review**

#### **From reader reviews:**
